EXAMINER'S AMENDMENT

1. Claims 1, 2, 4-7, and 18 are allowed.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eugene Proulx on 1/9/2007.

- Claims 8-17, previously withdrawn from consideration, are hereby cancelled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The present invention pertains to testing pin drivers of an IEEE 1149.1 compliant circuit by selectively controlling a pin driver enable input of the pin drivers for temporarily de-asserting a tri-stating signal of the pin drivers.

The prior art of record fails to teach or suggest the novel element of the instant invention. Specifically, the primary reason for allowance is the feature of: a tristate control circuit that temporarily de-asserts a tristate control signal during a capture state of a TAP controller when a first mode control input signal is a logic 1 as expressed in

Art Unit: 2138

independent claim 1; and an update control circuit having means for combining a test clock signal and a TAP run-test/idle state signal for producing a delayed update control signal, and means for selecting between a TAP Update-DR state signal and said delayed update control signal for providing an update signal to said BSR as expressed in independent claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
